Quantity: _____

Cab Dimensions

Choose the pads that match the configuration of your elevator and fill out the measurements that apply. All dimensions are in inches.

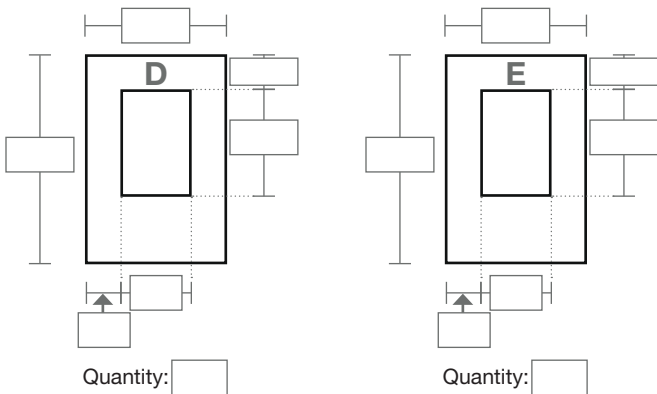

Height: measure from the top of the wall panel or ceiling to the floor.
 Make sure to subtract 4 inches from the height to meet fire codes.
 Width: measure from the left edge to the right edge of the wall.

Side and/or Rear Panel Options

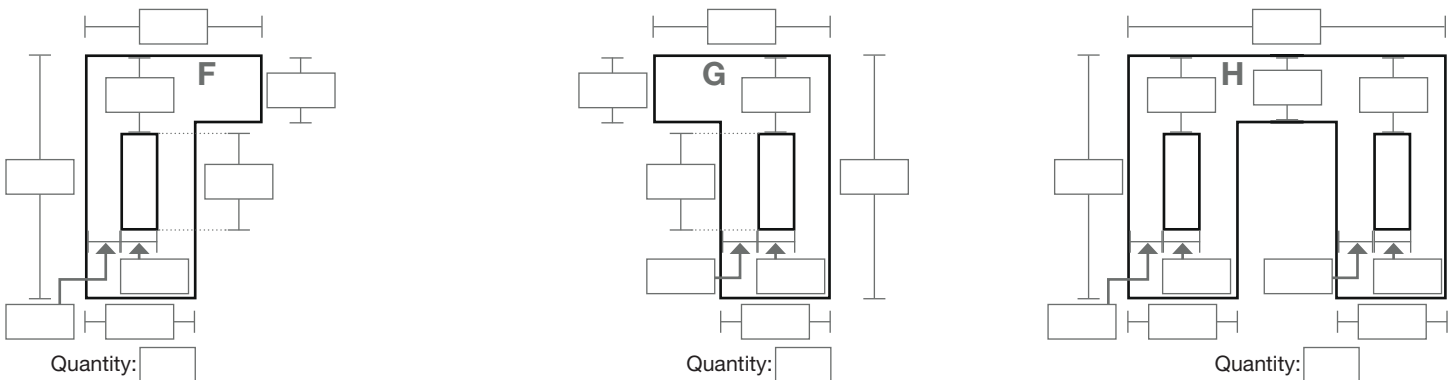

Standard Front and/or Rear Return Panel Options

1. Measure from the top of the wall panel or ceiling to the top of the cutout
2. Measure from the top of the cutout to the bottom of the cutout
3. Measure from the left edge of the wall to the left edge of the cutout
4. Measure from the edges of the cutout as directed on the diagram

Custom Front/Rear Return Panel Styles

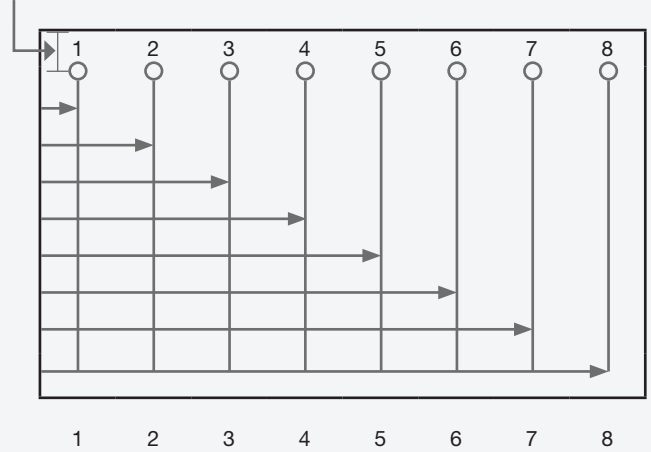

Grommet Spacing

Measure from the left edge of the wall to the centre of each grommet. Record each measurement in inches.

Grommet Position

Measure from top to centre of grommet inches
